Water

is the primary substrate of our bodies, the very essence of life. Since 1500 BC water has been used to create a hydrated and hygienic internal environment. The Angel of Water's advanced design now brings elegance, simplicity, and dignity to colon hydrotherapy. The Angel of Water® Surround—a gravity-fed, open design—is the premier colon hydrotherapy system and is the first choice for hospitals and clinics around the world. Whether used prior to endoscopic or radiological procedures, as pre-operative prep, or for internal cleansing of an impacted colon, the Angel of Water® is the safest, simplest, and most effective solution.

The Angel of Water's aesthetics invite the patient to enjoy a comfortable reclining chair experience lasting approximately 30-40 minutes. Patients will experience dramatic elimination results after one session and will appreciate and prefer the procedure over oral preparatory drinks. Staff members will appreciate its effectiveness, ease-of-use, and safety features. The Angel of Water® Surround is quiet, sanitary, odorless and easy to clean and maintain. It requires only a small room; one staff person can oversee two systems/rooms. The Angel of Water® will enhance the results of all scoping and surgical procedures.

Sanitation –

Water is the single most important element to hygiene! Prior to surgery and scope examinations, hospitals prepare the external environment by implementing disinfection protocols. But the most unsanitary part of the "room" is left unattended...inside the patient's colon! This is where billions of microorganisms are living that can negatively affect the outcome of the doctor's best efforts. Clean out the colon and set the stage for wellness.

Hydration –

The Angel of Water® can deliver water safely and comfortably to a patient via the colon, which not only hydrates that organ but also introduces more water to the liver and bloodstream via the portal vein. Water is the single most important solution for hydrating the patient. Improved hydration improves the peristalsis of the colon. Muscular performance of the bowel is enhanced with the simple introduction of water and by the science of hydraulics. The wave-like hydraulic action of water re-nourishes the impacted, dehydrated, or static bowel and empowers the tissues to get moving again. **Vital water brings nutrients into cells and moves waste products out of cells.**

Medical Settings

Hospitals	Rehab Clinics
Medical Clinics	Gastroenterology Clinics
Radiology Clinics	Nursing and Elderly Care Facilities

Medical Uses

- Prior to Endoscopic or Radiological Procedures
- Prior to Surgery
- Post Surgery
- Constipated or Impacted Colons

The Angel of Water® CM-1 Surround

Features

- > 8 gallon hypo-allergenic tank
- > Gravity-fed flow
- > Sediment, carbon, and ultraviolet filtration
- > Medical-grade vinyl backrest
- > Basin design allowing for colon and bladder release simultaneously
- > Single-use sterile rectal nozzle
- > View tube
- > Manual flush valve
- > Personal shower sprayer
- > No exposed pipes or wires
- > No sharp corners
- > Built-in safety rail
- > Internal exhaust fan
- > Under-cabinet storage
- > Dual control panels
- > Temperature control safety sensor
- > Uni-body basin for easy cleaning
- > *Optional Media Center
- > *Optional Ionization Filter

What the Doctors Say...

"The restoration of the intestinal elimination, too often ignored, is an important preliminary course to restoration of health. An inefficient colon is not always the cause of sickness, but it is believed to accentuate and prolong any and all diseased conditions of the human body."

J.E.G. Waddington, MD

"Colon hydrotherapy is the perfect specific procedure to eliminate constipation and restore normal bowel function. My approach to medical practice is to balance the GI tract using stool testing. I find various pathologies relating to bacteria, yeast, parasites, and other organisms of this nature. A lot of disease comes from imbalances in the colon, as manifested by inflammatory bowel disease, ulcerative colitis, autoimmune diseases, allergies, multiple sclerosis, and certainly constipation. Such imbalances can be corrected by means of colon hydrotherapy, herbal supplements, and diet." "There is no question about the huge difference a health professional can bring to the patient by utilizing colon hydrotherapy plus other complementary and alternative methods of healing."

**Dr. Paul Flashner, MD, former General Surgeon
and Emergency Medicine Specialist**

"Frequently while performing colonoscopy, I see that the patient is cleaned out from above but below, the diverticular still contain fecaliths... in pockets formed on the gut mucosa. They indicate the presence of an unhealthy colon, and over 50% of Americans possess diverticulosis colae. When inflamed, gastroenterologists called them diverticulitis colae, which can be serious by creating fistulas. Some people then will evacuate through their bladders." "With patients for whom I perform colonoscopy, about one third of them over the age of fifty who are otherwise cleaned above, still show residual stools sitting in these gut mucosa pockets. Some have held onto the stool

pockets for decades. A toxic dumpsite like this is dangerous for them by the elevated concentration of poisons stored in the dumpsite. Cancer can develop!" "A good cleanout by use of colon hydrotherapy is excellent treatment. I recommend that people undertake colon hydrotherapy for themselves. Clean out the body's pipes." "And by all means, I prefer [that] my patients undergo colon hydrotherapy the morning of a colonoscopy. It's a safe way to cleanse the gut. It's a healing technique for the relief of irritable bowel syndrome with gas and bloating, chronic constipation, abdominal discomfort, and many other GI tract problems."

**Robert Charm, MD, Walnut Creek, California,
board-certified gastroenterologist since 1972**

What our Clients Say...

"The Angel of Water® is the equipment that I recommend for patients who have severe constipation and fecal impaction. The results have been very positive. For my patients who have prolapsed colon and sluggish conditions, this is very good equipment. The equipment is easy to keep clean and sanitize. The Angel of Water® is of the highest quality construction. I highly recommend it. And the technical support from the company is fantastic. Finally, it is the favorite equipment for some of my patients."

**Carlos Ayala, Retired M.D. (Colombia),
Doctor of Naturopathy, Colon Therapist**

"I was looking for the most appropriate colon hydrotherapy equipment for my anti-aging medicine practice when I was introduced to the Angel of Water®. I knew that this equipment would best fit my busy practice and thought it the most aesthetic equipment available for the intended purpose. My staff, patients, and I have been very happy with the results of my choice and the system's ability to operate without odor. Most importantly, the equipment looks very welcoming and not intimidating at all."

Maria Sulindro-Ma, MD, Pasadena, CA
